

## **Enterprise Practice Management**

### Remarkable design. Empowering your practice to thrive.

Never before has such a powerful system been so easy to use. Already used by thousands of physicians, NextGen® EPM is the ideal system to improve both patient care and your bottom line.

#### THE SMART INVESTMENT

With all of the depth and maturity you would expect from a world-class application, NextGen® EPM combines an intuitive, easy-to-use interface with true enterprise functionality. NextGen® EPM features customizable, encounter-driven scheduling and billing processes that enable administrators to proactively manage the business of healthcare. In addition, NextGen® EPM includes measures for quality assurance in managing patient financials.

#### A STEP ABOVE THE REST

NextGen® EPM offers key functionality that most other vendors' systems do not. Multiple master patient indexes can be defined and operate on a single database. Clients have the ability to automate internal policies and procedures within the logic of the sytem and have tasks automatically assigned and distributed to the appropriate people. The Ad-Hoc Report Writer is extremely easy to use and features drill down capabilities and enables users to easily customize reports and memorize them for future use. NextGen® is also one of the few products that completely re-designed the claims, remittance, and eligibility files within the application around HIPAA requirements. As a result, clients can go direct for claims and remittance transmissions to any insurance payer that adheres to these standards.

### Want to know more?

### NEXTGEN

NextGen® EPM is a true enterprise practice management system with robust features that deliver superior return on investment by streamlining front and back office administration, improving communication among the staff, reducing A/R days, and enhancing the quality of patient care. This software is scalable to meet the needs of any size medical practice from a small solo practice to a large multi-provider, multi-location, healthcare groups and multi-group enterprises.
