

Performance Efficiency Tool (PET)

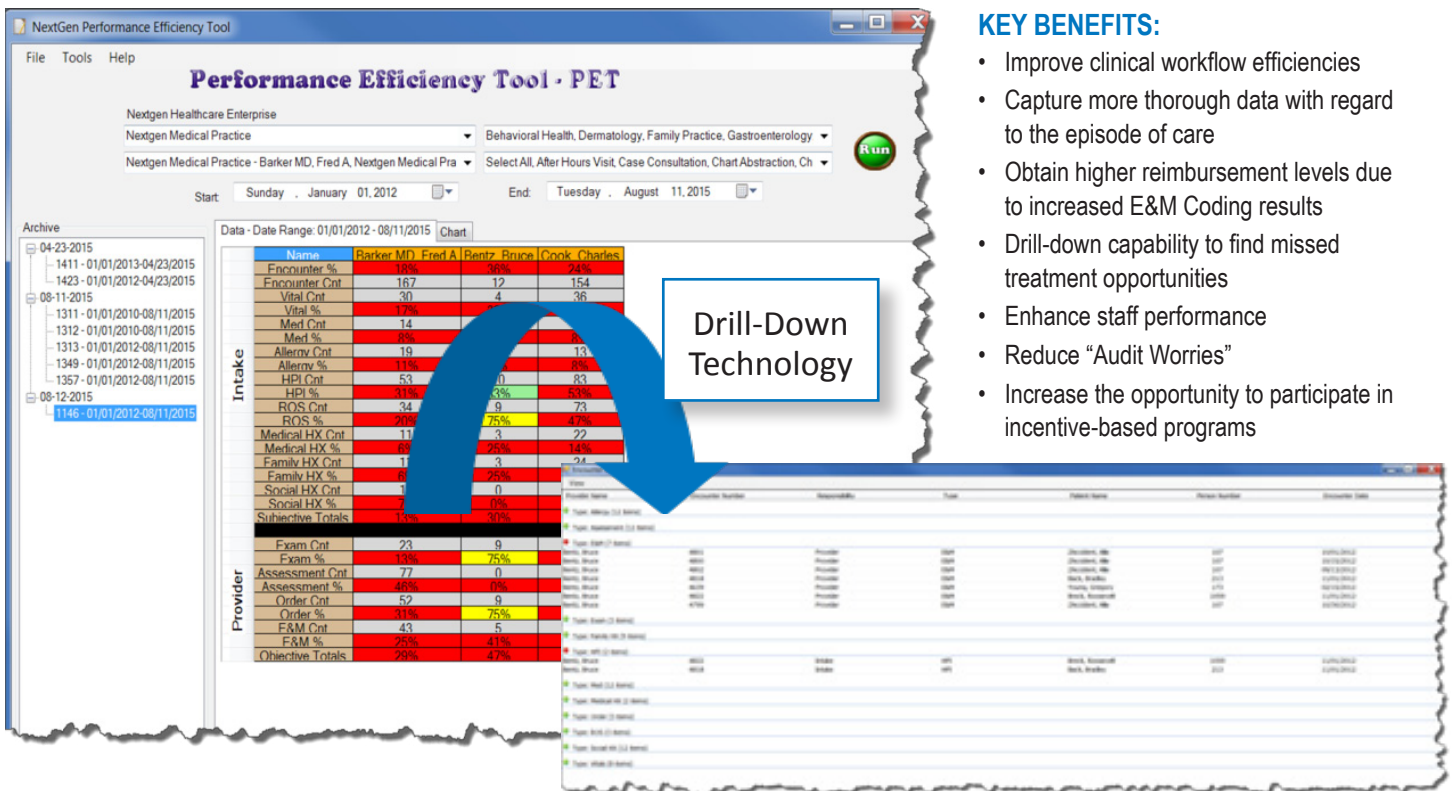

The Performance Efficiency Tool (PET) ... for the practice that is looking to achieve higher levels of reimbursement, while reducing manual chart audits through improved clinical documentation and workflow processes.

CHALLENGE:

Healthcare organizations are in a constant state of change. The demands of ensuring practitioners are documenting clinical episodes in the most efficient, thorough and consistent manner have become paramount. How can healthcare organizations ensure that all practitioners are documenting clinical episodes to the standards set by their practice?

SOLUTION:

The Performance Efficiency Tool (PET) is fully integrated with your NextGen® EHR system. It is a real-time solution designed by GBS to enhance performance and drive success. The PET automates the manual, labor-intensive process of chart audits. PET enables practice administrators, as well as other key stakeholders, to review both the subjective and objective portions of a clinical episode efficiently, thus reducing administrative costs involved in painstaking chart audits. Ultimately, this tool will enhance your ability to attain a content-rich chart.

Drill-Down Technology

Provider Name	Encounter Number	Encounter Date	Encounter Type
Charles, Fred	101	01/01/2012	Case Consultation
Charles, Fred	102	01/01/2012	Case Consultation
Charles, Fred	103	01/01/2012	Case Consultation
Charles, Fred	104	01/01/2012	Case Consultation
Charles, Fred	105	01/01/2012	Case Consultation

KEY BENEFITS:

- Improve clinical workflow efficiencies
- Capture more thorough data with regard to the episode of care
- Obtain higher reimbursement levels due to increased E&M Coding results
- Drill-down capability to find missed treatment opportunities
- Enhance staff performance
- Reduce "Audit Worries"
- Increase the opportunity to participate in incentive-based programs

KEY FEATURES:

- Seamless integration with the NextGen® EHR application
- Configurable threshold settings
- Intuitive filtering system
- Built-in archival functionality

TECHNICAL REQUIREMENTS:

- Operating System (OS) - Windows XP or greater
- ODBC Connection to the NextGen® Production Database (NGProd)
- Microsoft Excel Version 2007 or greater

You can anticipate savings from reduced audit time, improved patient care, and improved coding.
