EasyID®

EasySIGN REGISTRATION • EasySIGN BEDSIDE • EasySIGN ANYWHERE

EasySIGN REGISTRATION

What's Included?

- EasySIGN REGISTRATION** – Working with the hospital's registration system and EasySIGN, patients register and electronically sign documents at the registrar's desk with dual computers. The registrar presents each electronic form for signature and the patient may receive completed copies via print or email. Patient photos and document images (driver's licenses, insurance cards) can be uploaded to the HIS, and payments can be processed. **Even register patients and sign documents during ADT downtimes!**
- EasySIGN BEDSIDE** – Use a tablet computer along with the hospital registration system and EasySIGN to register patients from any location in the hospital or grounds, even in the ambulance. Once the patient is registered, allow them to electronically sign important documents right from their bed or any other point-of-care location. Quickly scan the patient's barcoded wristbands, take images of photos or ID cards, and **easily register patients and sign documents during ADT downtimes!**
- EasySIGN ANYWHERE** – As simple as checking into an airline flight, EasySIGN ANYWHERE utilizes a patient's personal smartphone device or home computer for electronic document signature and many other mobile patient registration features. EasySIGN ANYWHERE will improve efficiencies, save time, and reduce costs.

EasySIGN

is a simplified approach to collecting patient signatures, photos, and scanned ID cards at the Registration Center, Bedside, or Anywhere from a mobile device. With EasySIGN, quickly process patients and ensure that forms and consents* are electronically signed and stored in the EHR for safekeeping. It's so **EASY!**

Use EasySIGN to Enhance Social Distancing and Contactless Registration Processes.
